TWELVE CREDIT UNIONS CHOOSE HOMECU SOLUTION IN 4TH QUARTER 2000

Boise, Idaho - December 26, 2000 - Database Management Services, Inc. announced today the addition of twelve (12) credit unions to the HomeCU Internet banking solution during the fourth quarter of this year. The total number of institutions using or contracted for HomeCU currently stands at fifty-seven (57).

"Considering the significant increase in new contracts during the period we're very pleased to be running ahead of schedule on our installations," said Jan Brinkerhoff, Vice President of DMS, "the ease of deployment designed into the system is really proving out." Interfaces exist that allow the HomeCU system to integrate easily with many popular Data Processing systems.

"We built the product exclusively for Credit Unions and sell it only to Credit Unions. Our clients appreciate the fact that we're focused on their segment of the financial services market," said Joe Pearson, President of DMS. "Our first client went online in 1996 and has been running successfully ever since. As a company, we've grown and been profitable every year since we started in 1989. Our experience and stability should be very appealing to prospective clients," said Pearson.

Examples of HomeCU clients added during the fourth quarter 2000 include: First Community Credit Union, Minnesota, Cross Valley Federal Credit Union, Pennsylvania, Weber Credit Union, Utah, and L'Oréal USA Federal Credit Union, New Jersey.

A complete list of HomeCU clients is available online at www.homecu.com/clients.html.

About HomeCU
